CAREER OBJECTIVE

As a final-year Information Technology student, I am looking for an internship opportunity as a Software Tester to strengthen my skills in test case design, functional test scripting, and collaborative teamwork in a real-world environment. I am a fast learner with a strong commitment to quality and teamwork, eager to contribute to project success and continuous software improvement.

SKILLS

Programming Language: JavaScript, HTML, CSS

Technical Skills

- Databases: MySQL, MongoDB
- Frameworks/Platforms: ReactJs, NextJs, Bootstrap, SCSS, NodeJs, ExpressJs,

Testing Skills

- Testing: Writing functional requirement docs, Use Case diagrams, Test Cases

Tools: Git, Jira, Postman, Cypress, Jest, draw.io, Microsoft Office

Soft Skills: Communication, Teamwork, Proactive learning

Language: Can read and write English at a basic level, speaking and listening skills are not strong.

PROJECTS

Graduation Project: E-commerce website integrated with facial recognition attendance system

01/2025 - 05/2025

Team Size: 2

Role: Backend Developer & Tester

The project builds a website for sales and employee management by integrating a facial recognition system for attendance tracking.

Responsibilities:

- Wrote functional requirement documents for the system
- Designed Use Case diagrams and business process flows using draw.io
- Conducted system demos and gathered feedback from the supervisor
- Created test cases for system features
- Developed backend APIs and structured the system architecture

Technologies Used:

- Backend: Node.js, Express.js, MongoDB, TensorFlow.js
- Tools: Cypress, Postman, draw.io

Personal Project: VECHAI

09/2023 - 12/2023

Role: Full Stack Developer

VECHAI is a website that facilitates buying and selling second-hand items. The system is divided into three main user roles: buyer, saler and yard.

Responsibilities:

- Implemented new features
- Performed functionality testing before deployment
- Identified and fixed bugs, improved existing features

Technologies Used:

- Frontend: Next.js, Bootstrap, Leaflet
- Backend: Node.js, Express.js, Socket.IO
- Database: MySQL
- Tools: Postman

Github: <https://github.com/ngan8902/Project-Website-VECHAI->

Personal Project: Mango Store

08/2023 - 09/2023

Team Size: 3

Role: Frontend Developer

Mango Store is an online clothing website developed by a team of three. I was responsible for building the customer-facing user interface.

Responsibilities:

- Designed UI mockups
- Implemented the frontend interface
- Fixed UI bugs

Technologies Used:

- Frontend: ReactJS, Bootstrap 4, JavaScript, HTML, SCSS
